## MAINTENANCE AND STORAGE CARE

You must follow these guidelines to let that your clothing **maintains its quality and extend its durability**:

- Taking into consideration normal wear and tear to maintain the integrity and preserve the durability of the clothing, it is necessary to take some precautions when handling and using and, strictly observe the washing instructions on the interior label.
- Cotton clothing tends to lose color when exposed to sunlight and light, this happens, even more, when the clothing is used by workers who do tiring physical activities that promote sweat.
- In the first washes, it is natural that cotton clothing has a slight size reduction and even a slight color loss. Thus, it is recommended to take the utmost care with washing temperatures, color separation, using suitable detergents and drying.
- Zip fasteners on clothing are tested by manufacturers through tensile tests to ensure strength during normal use.
- The frequent use of clothing, particularly in the workplace, subject the zipper to considerable stress. In order to guarantee its durability, it must be used correctly, especially in the presence of the double slider, which works on a more delicate mechanism than an individual slider. By forcing the zipper, the sliding mechanisms are modified.
