

BOOT SUZUKA S5 SRC

EN ISO 20345

CHEMITOOL Boot SUZUKA S5 SRC is a safety boot with a steel toe cap, PVC upper, PVC sole with nitrile rubber, and steel anti-perforation insole. Suitable for use in the harshest industrial environments thanks to its excellent characteristics: antistatic, non-slip, highly resistant to oils, grease, acids, and organic solvents.

Suitable for use in livestock, gardening, forestry, fruit and vegetable growing, chicken farms, sugar factories, swine farms, veterinary, agricultural schools, and all types of industry.

- ✓ Light, smart and dynamic design
- ✓ Impact-resistant steel toe cap up to 200J
- ✓ Anti-perforation insole
- ✓ Antibacterial abrasion resistant jersey lining
- ✓ Hydrocarbon resistant, antistatic, and non-slip sole
- ✓ Shock absorption in the heel area
- ✓ High level of slip resistance

TECHNICAL SPECIFICATIONS

COMPOSITION	PVC/NITRILE
Toecap	Steel
Anti-perforation insole	Steel
Upper	PVC
Lining	Jersey
Sole	PVC/Nitrile
Color	Black
Sizes	36-48

OIL RESISTANT SOLE

- SOLA RESISTENTE A ÓLEOS E HIDROCARBONETOS
- SUELA RESISTENTE A ACEITES E HIDROCARBUROS

STEEL TOE CAP

CE 200J

- CE 200J BIQUEIRA DE AÇO
- CE 200J PUNTERA DE AÇERO

WATER REPELLENT

WATER-PROOF

- IMPERMEÁVEL REPLENTE DE ÁGUA
- IMPERMEABLE REPELENTE AL AGUA

DOUBLE DENSITY

PU OUTSOLE

- SOLA PU DUPLA DENSIDADE
- SUELA DOBLE DENSIDAD

MAINTENANCE AND STORAGE CARE

You must follow these guidelines to allow that your footwear keeps its quality and extend its durability.

- When taking off your shoes, let your footwear air out before storing them.
- You should always keep your shoes dry and preferably clean. You can place a sheet of newspaper or absorbent paper inside the shoes to absorb the moisture from sweating. It prevents bad odors and the creation of bacteria that can cause fungus.
- You must not use the same shoes twice in a row! The shoes must have time to completely dry the sweating that they have absorbed during the day. If they are damp, can develop bacteria causing unpleasant odors and, even more serious, the proliferation of fungus and consequently diseases, such as unwanted mycoses.
- Clean regularly with a brush or cloth to prevent accumulation of dirt and preferably wash them at least once a month. Never put in a washing machine or dryer.
- Regularly disinfect the shoe inside with a suitable spray, you can also use isopropyl alcohol or baking soda.
- Wash the insole regularly and change it when it is not in its proper condition.
- Shoes should be stored in their original packaging in a cool, dry place and away from light.

HOW TO CLEAN THE BOOT

- The ideal is to clean your boots regularly, after each use, with water and detergent using a soft brush. It should be rinsed with abundant water and let dry at room temperature and in the shade.

HOW TO CLEAN THE INSOLE

- It is important to clean and replace regularly the insole to prevent the proliferation of bacteria. When replacing it, ensure that you are using an insole like the original.
