- CE 200J PUNTERA DE COMPOSITE

DOUBLE DENSITY PU OUTSOLE

- SOLA PU DUPLA DENSIDADE
- SUELA DOBLE DENSIDAD

NON-METALLIC NO METALLIC COMPONENTS

- NÃO METÁLICO
SEM COMPONENTES METÁLICOS
- NO METÁLICO
SIN COMPONENTES METÁLICOS

MAINTENANCE AND STORAGE CARE

You must follow these guidelines to allow that your footwear keeps its quality and **extend its durability**.

- When taking off your shoes, let your footwear air out before storing them.
- You should always keep your shoes dry and preferably clean. You can place a sheet of newspaper or absorbent paper inside the shoes to absorb the moisture from sweating. It prevents bad odors and the creation of bacteria that can cause fungus.
- You must not use the same shoes twice in a row! The shoes must have time to completely dry the sweating that they have absorbed during the day. If they are damp, can develop bacteria causing unpleasant odors and, even more serious, the proliferation of fungus and consequently diseases, such as unwanted mycoses.
- Clean regularly with a brush or cloth to prevent accumulation of dirt and preferably wash them at least once a month.
- Regularly disinfect the shoe inside with a suitable spray, you can also use isopropyl alcohol or baking soda.
- Wash the insole regularly and change it when it is not in its proper condition.
- Shoes should be stored in their original packaging in a cool, dry place and away from light.

HOW TO CLEAN TO REMOVE MORE DIFFICULT DIRT

- **Leather footwear:** clean with a slightly damp cloth and, as the last option you can use a soft cloth or a soft brush with neutral soap. You should avoid this procedure as it can stain the leather, test before in a less visible area. Let it air dry, but not expose to the sun, after drying apply a moisturizing cream or shoe polish
- **Suede footwear:** To protect against stains and water splashes, you should use a suitable waterproofing spray. Do not use water to clean this material. To clean, use a bristle brush and brush the shoes in the opposite direction to the suede fibers to remove dust and dirt. At the end, pass the brush in the suede fibers direction to leave it in the initial position.
- **Microfiber and fabric footwear:** Microfiber can be washed or sanitized at up to 60°C without drying out or losing its original characteristics. You should only wash it with water and neutral detergent. Microfiber shoes should also dry at room temperature and in the shade, and never near sources of intense heat, such as clothes dryers, boilers, heaters, stoves, cookers or the sun, as the footwear can lose its flexibility.
