Laboratory test results.

APPLICATIONS

Recommended for cleaning tiles, cement stone, façades, floors and other surfaces.

METHOD OF APPLICATION

Dilution: Can be applied neat or diluted up to 2 parts with water.

Application Method: Brush, spray or spray gun.

Performance: Pure 1L for 6 to 8m².

APPLICATION

- Carefully remove the packaging.
- Apply by spraying close to the surface to avoid dispersion of the product, in smaller areas it can be applied with a brush, in normal washes the action time will be about 15 minutes, more complicated dirt increase the time of permanence.
- Then wash thoroughly with a pressure washer. Do not apply the product on metals (aluminium, gold and others not resistant to alkaline products). If in doubt as to whether the surface is resistant to the product, make a preliminary test.
- The use of personal protective equipment is required.

SAFETY INFORMATION

Corrosive product. Causes severe burns. Store locked up and out of reach of children.

For further information and advice on the safe handling, storage and disposal of chemical products, the user should refer to the most recent version of the Product Safety Data Sheet containing physical, ecological, toxicological and other safety-related data.
