

PLASMA CUTTING MACHINE

Recommended for welding work. High efficiency, high performance equipment. Plasma cutting machine equipped with the most advanced inverter technology.

Professional plasma cutting machines equipped with the latest inverter technology. The development of plasma equipment generates the current through an inverter, possessing many advantages over conventional transformer devices.

Product advantages

- High efficiency and high performance equipment
- Portable
- Integrated compressed air system (C models)

Fields of application

Applications

All kinds of compressed air requirements in industrial, workshop, maintenance and production applications.
