

BIMETAL HOLE SAW SETS

CHEMITOOL hole saw sets have as their main function to allow the professional to have access to different diameters and accessories in a fast and organized way.

- ✓ **Great quality/value ratio**
- ✓ **Available in HSS and HSS 8% Co**
- ✓ **Version in 8, 11 and 19 pieces**
- ✓ **Plumber, Electrician and Industrial**
- ✓ **Break resistant**
- ✓ **Long tool life**

The set produced in bimetallic steel M3 and M42 of high quality for different types of applications, being designed especially for each segment of work.

Bimetal steel M3

Plumber (8pcs)
Plumber (11pcs)
Electrician (8pcs)
Industrial (19pcs)

Bimetal steel M42

Plumber (11pcs)
Industrial (19pcs)

Equipped with the respective pilot drill shafts, high-speed steel and high-speed steel with 8% cobalt, the latter more suitable for jobs where it is necessary to guide in harder materials (stainless steel, for example).

The fittings/arborers are solidly built to sustain the pressure exerted by the power tool, meaning that there is no loss of energy when drilling and that the cutting process is continuous.

It is important to note that hole saws must be applied at a 90° angle to the contact surface.

In situations where the workpiece does not have support, it must be held firmly in a clamp or vise, to prevent it from being displaced, thus avoiding its breakage or rotation together with the hole saw.

Body

Bimetallic steel M3 and M42

Suitable for

Stainless steel, steel, wood, plastic, aluminium and non-ferrous metals

Compatible equipment

Drill machine without percussion
