

SELF-ADHESIVE MESH DISCS PRONET ULTIMATE

PRONET ULTIMATE CHEMITOOL self-adhesive sanding discs in mesh format have been specially developed to provide extraordinary workability due to their resistance to abrasion, as well as the special composition of aluminium oxide and silicon carbide, increasing durability by up to 4x compared to a traditional sanding disc.

- ✓ Excellent quality/value ratio
- ✓ Easy to use
- ✓ Diameter from 125 to 225mm
- ✓ Self-adhesive system
- ✓ Uniform finish
- ✓ High durability, up to 4x longer

The self-adhesive sanding disc in mesh format, with sturdy mesh backing, can be used on the most diverse substrates, such as wood, wood composites, coatings and even plasterboard.

This high-performance sanding disc has a filtration system without holes, making it easy to suck up all the sandpaper, causing no residue to build up on the sandpaper and thus generating a better surface finish.

This type of mesh sanding disc allows them to be used for more aggressive sanding, as well as for preparation/stage sanding.

For greater durability, this disc can be rinsed with water to remove any residue, allowing the sandpaper to be used again as if it were new.

The reduction in dust inhaled by the user makes this disc more productive and dirt-free.

Abrasive
Aluminium oxide and silicon carbide

Suitable for
Wood, resinous woods, coatings and plasterboard

Compatible Machine
Sander
