

JACKET FENCE

Anti-static and flame-retardant jacket, ideal for welders, with resistance to electric arcs and chemical products. It features reinforced seams, a metal zip with protective cover, reflective strips, a chest pocket with badge and pen holders, concealed front pockets, and a patch with certifications. The jacket has an adjustable hem and cuffs with Velcro, ensuring extra protection. All visible accessories are flame-resistant and do not have direct metal contact with the skin.

- ✓ Antistatic, antacid, fireproof and arc flash-resistant
- ✓ Fitted back with Velcro
- ✓ Reinforced double seams on sleeves and sides

TECHNICAL SPECIFICATIONS

Composition	75% COTTON + 23% POLYESTER + 2% DISSIPATIVE FIBRE
Appearance	Twill
Colors	Blue Navy
Weight	280 gr
Sizes	S-M-L-XL-XXL
Packaging	1/20
Standards	<p>FENCE jacket is a PPE (Personal Protection Equipment) that belongs to the category III for IRREVERSIBRE RISKS and complies with the provisions of Regulation (EU) 2016/425 and with the standards:</p> <ul style="list-style-type: none"> • EN 17353:2020 (Type B3 equipment for low light and dark conditions) • EN ISO 11612: 2008 for protective clothing - electrostatic properties: Part 5: Material performance and design requirements. • IEC 61482-2: 2018 - live working - protective clothing against the thermal hazards of an electric arc: Part 2: Requirements. • EN ISO 11611: 2015 for protective clothing for use in welding and allied processes. • EN ISO 11612: 2015 for protective clothing - Clothing to protect against heat and flame: Requisitos mínimos de desempenho. • EN ISO 13034: 2005+ A1: 2009 for protective clothing against liquid chemicals: Performance requirements for chemical protective clothing offering limited protective performance against liquid chemicals (Type 6 and Type PB [6] equipment).

MAINTENANCE AND STORAGE CARE

You must follow these guidelines to let that your clothing **maintains its quality and extend its durability**:

Taking into consideration normal wear and tear to maintain the integrity and preserve the durability of the clothing, it is necessary to take some precautions when handling and using and, strictly observe the washing instructions on the interior label.

Cotton clothing tends to lose color when exposed to sunlight and light, this happens, even more, when the clothing is used by workers who do tiring physical activities that promote sweat.

In the first washes, it is natural that cotton clothing has a slight size reduction and even a slight color loss. Thus, it is recommended to take the utmost care with washing temperatures, color separation, using suitable detergents and drying.

Zip fasteners on clothing are tested by manufacturers through tensile tests to ensure strength during normal use.

The frequent use of clothing, particularly in the workplace, subject the zipper to considerable stress. In order to guarantee its durability, it must be used correctly, especially in the presence of the double slider, which works on a more delicate mechanism than an individual slider. By forcing the zipper, the sliding mechanisms are modified.
