

## METAL SANDING SHEET PROMETAL FLEX

PROMETAL FLEX CHEMITOOL metal sanding sheet is specially manufactured from good quality aluminum oxide, in order to obtain superior performance in sanding applications in metal work.

- ✓ **Great quality/value ratio**
- ✓ **Easy to use**
- ✓ **Format 230x280mm**
- ✓ **Superior flexibility**
- ✓ **General use in metal**
- ✓ **Tear resistant**

The CHEMITOOL flat metal sanding sheet, with blue cotton cloth backing, is suitable for sanding metal, especially when it is necessary to adapt the sandpaper to contours and curved surfaces.

This type of sanding sheet allows them to be used for more aggressive sanding, as well as in preparation/step sanding.

Given its dimensions, it can be used in its entirety or, in turn, allows the operator to cut into two formats, 115x280 or 93x230. This makes it possible to make the most of the sanding sheet for use in power tools or hand tools.

It must be used without adding water, only for dry work.

Packed in packs of 50 units, with a plastic coating to increase the durability of the abrasive, not subjecting it to humidity, increasing the longevity of the abrasive.

**Abrasive**  
Aluminium Oxide

**Suitable for**  
Metal
