

SAFETY SHOE

PIKES PEAK S1PL SR FO

Made from micro-perforated suede leather and breathable mesh lining that maximises ventilation and keeps feet cool. Completely non-metallic, with plastic eyelets, composite toecap and Kevlar anti-perforation insole, guaranteeing lightweight and resistant protection. The hi-poly comfort insole not only absorbs perspiration but also has anti-mould and anti-fungal properties, promoting a healthy environment for your feet. The dual-density PU sole is designed to offer superior durability and excellent grip on challenging surfaces, while the sider effective detail increases visibility in low-light conditions.

- ✓ **Composite toe cap**
- ✓ **Kevlar anti-perforation insole**
- ✓ **Hi-Poly Shock-absorbing and antibacterial insole**
- ✓ **Anti-static sole with impact absorption on the heel**
- ✓ **Oil and hydrocarbon resistant sole**

TECHNICAL SPECIFICATIONS

COMPOSITION	SUEDE AND MESH
Exterior	Sued
Interior	Fabric
Anti-perforation insole	Kevlar
Insole	Hi-Poly
Toe cap	Composite
Outsole	DUAL DENSITY POLYURETHANE
Color	Grey;
Sizes	36-47

COMPOSITE TOE CAP CE 200J

- CE 200J COMPOSITE TOE CAP
- CE 200J EMBOUT COMPOSITE

INSOLE ANTIBACTERIAL SHOCK ABSORBING

- HI-POLY INSOLE
MORE ALL-DAY COMFORT
- MODÈLE HI-POLY
PLUS CONFORT TOUTE LA JOURNÉE

OUTSOLE PU

- PU SOLE DUAL DENSITY
- PU SOLE DOBLE DENSITÉ

NON-METALLIC NO METALLIC COMPONENTS

- NON-METALLIC
NO METAL COMPONENTS
- NON-MÉTALLIQUE
SANS COMPOSANTS MÉTALLIQUES

MAINTENANCE AND STORAGE CARE

You must follow these guidelines to allow that your footwear keeps its quality and **extend its durability**.

- When taking off your shoes, let your footwear air out before storing them.
- You should always keep your shoes dry and preferably clean. You can place a sheet of newspaper or absorbent paper inside the shoes to absorb the moisture from sweating. It prevents bad odours and the creation of bacteria that can cause fungus.
- You must not use the same shoes twice in a row! The shoes must have time to completely dry the sweating that they have absorbed during the day. If they are damp, can develop bacteria causing unpleasant odours and, even more serious, the proliferation of fungus and consequently diseases, such as unwanted mycoses.
- Clean regularly with a brush or cloth to prevent accumulation of dirt and preferably wash them at least once a month.
- Regularly disinfect the shoe inside with a suitable spray, you can also use isopropyl alcohol or baking soda.
- Wash the insole regularly and change it when it is not in its proper condition.
- Shoes should be stored in their original packaging in a cool, dry place and away from light.

HOW TO CLEAN TO REMOVE MORE DIFFICULT DIRT

- **Leather footwear:** clean with a slightly damp cloth and, as the last option you can use a soft cloth or a soft brush with neutral soap. You should avoid this procedure as it can stain the leather, test before in a less visible area. Let it air dry, but not expose to the sun, after drying apply a moisturizing cream or shoe polish
- **Suede footwear:** To protect against stains and water splashes, you should use a suitable waterproofing spray. Do not use water to clean this material. To clean, use a bristle brush and brush the shoes in the opposite direction to the suede fibres to remove dust and dirt. At the end, pass the brush in the suede fibres direction to leave it in the initial position.
- **Microfiber and fabric footwear:** Microfiber can be washed or sanitized at up to 60°C without drying out or losing its original characteristics. You should only wash it with water and neutral detergent. Microfiber shoes should also dry at room temperature and in the shade, and never near sources of intense heat, such as clothes dryers, boilers, heaters, stoves, cookers or the sun, as the footwear can lose its flexibility.
