

## ABS HELMET WITH MANUAL ADJUSTMENT

ABS Helmet with manual adjustment, ideal for full-time work in places where there is a risk of falling objects and electrical discharges up to 440V ac, offering perfect and long-lasting protection.

- ✓ **ABS shell**
- ✓ **Polyethylene harness**
- ✓ **Manual adjustment**
- ✓ **Electrical protection up to 440V AC**
- ✓ **4 anchor points**
- ✓ **Universal slot: 30mm**

CE III CAT

EN 397: 2012+A1:2012

## TECHNICAL SPECIFICATIONS

Shell material	ABS injection
Harness material	injection moulded polyethylene
Type of adjustment	manual
Weight	0,315 kg
Working temperature	-10°C/+ 50°C
Electrical protection	440V AC
Packaging	1/36
Certification	CE EN 397: 2012+A1:2012, Notifying Body N° 0161

## CARE AND MAINTENANCE AND STORAGE

Follow these recommendations to ensure that your PPE maintains its quality and prolongs its durability:

Before first use, the helmet should be inspected for possible defects that could affect the user's safety;

The expiry date for helmets should be checked on the Technical Data Sheet for each piece of equipment, as this varies according to the supplier. This model is valid for 5 years from the date of manufacture on the shell.

Helmets should be checked regularly, as climatic variations and incorrect use and packaging can alter the physical and mechanical characteristics of the equipment;

Whenever a helmet falls or is subject to an accident at work, it must be rendered unusable, as its protection is compromised;

Never use a defective helmet;

The helmet should be washed regularly so that dirt does not hide possible defects.

## INSTRUCTIONS FOR USE

The headgear should adapt to the shape of the head and should be worn well adjusted to the head in order to minimize the impact of falling objects;

In high and windy places, the helmet should have a jugular fastening strap;

The front flap should be placed forward so as to protect the face from falling objects;

To better identify each worker and their professional category, opt for a colour system;
