

METALLIC MESH FACE VISOR

CHEMITOOL Metallic mesh face visor has been designed to offer effective protection against impacts from particle projections that can cause eye injuries. It is recommended for use in work related to domestic gardening machinery. Mesh protectors do not protect against liquid splashes (including molten metal), hot solids, electrical hazards, or infrared and ultraviolet radiation.

- ✓ **Harness with regulator and sweating band**
- ✓ **Covers the whole face**
- ✓ **Replacement visor available**
- ✓ **Standard EN 1731**

Browguard

The semi-circular browguard is manufactured of black polypropylene and includes a narrow brim. The sides contain a at section with two holes used to attach the headgear by means of nuts and bolts.

Headgear

The headgear is composed of a harness and adjustment mechanism, manufactured of black injection-moulded polyethylene. The harness comprises two parts, an upper cross strap and a contour strap. The length of the cross strap can be adjusted to ve different positions. The contour strap has a middle section (which rests on the wearer's forehead) and side arms that join at the rear of the head by means of the adjustment system. This system allows easy adjustment of the contour band circumference, by a simple turn of the wing nut. For greater comfort, the contour strap has an anti-sweat band on the front of the strap where it rests on the wearer's forehead.

Visor

The visor is made from a painted iron mesh injected with black polypropylene. The visor at the top has three holes to accommodate the solid studs of the mount.

TECHNICAL SPECIFICATIONS

Material	Polycarbonate
Size	380 x 208 x 0,3 mm
Harness size	52-61 cm
Weight	0,230 kg
Packaging	1

SAP	COLOR	EAN
