CLEAR POLYCARBONATE GLASSES

Clear polycarbonate glasses designed to offer effective protection against the risk of high-speed, low-energy particle impact. The lenses are therefore capable of withstanding the impact of small projectiles such as wood, metal and plastic shavings, pieces of stems and branches that fly off when using gardening machinery, etc. The speed of the projectiles must be less than 45 m/s. Their special design minimizes the side viewing angle and, thanks to their optical neutrality and extreme lightness, allows prolonged use without causing discomfort to the wearer.

- ✓ **Material: Polycarbonate**
- ✓ **One size fits all**
- ✓ **Colourless**
- ✓ **Lightweight**

TECHNICAL SPECIFICATIONS

TECHNICAL SPECIFICATIONS	
LENS MATERIAL	POLYCARBONATE
SHAFT MATERIAL	POLYCARBONATE
COLOUR	COLOURLESS
PACKAGING	1/12
CERTIFICATION	EN 166:2001
OPTICAL CLASS	1
PROTECTION AGAINST THE RISK OF HIGH-SPEED, LOW-ENERGY IMPACTS AND PARTICLES	F
USE	Suitable for work where there is a risk of impact from small projectiles, such as wood, metal and plastic shavings, pieces of stems and branches, etc.
