

STUD CRIMPER

CHEMITOOL stud crimper are essential for joining metal sheets and profiles commonly used in plasterboard construction systems. Quick fastening of the parts simplifies the installation of profiles, initially holding the parts together, before proceeding with the final screwing. Easy to use, it allows for the safe assembly of plasterboard metal structures, making it easy to remove them for any necessary adjustments before final fixing.

- ✓ 9" / 225mm
- ✓ Maximum profile thickness 0.8mm
- ✓ Time saving
- ✓ One-handed operation
- ✓ Non-slip handle
- ✓ Lightweight

APPLICATION FIELDS

- ✓ Civil construction
